

2008

- [1] M. Bravenboer. *Exercises in Free Syntax*. PhD thesis, Utrecht University, Utrecht, The Netherlands, January 2008.
- [2] K. Olmos. *Strategies for Context-Sensitive Program Transformation*. PhD thesis, Universiteit Utrecht, Utrecht, The Netherlands, 2008. (In progress).

2007

- [3] K. T. Kalleberg. *Abstractions for Transformations*. PhD thesis, Bergen University, Bergen, Norway, June 2007.
- [4] S. Mak. Developing interacting domain specific languages. Master's thesis, Utrecht University, Utrecht, The Netherlands, November 2007. INF/SCR-07-20.

2006

- [5] E. Dolstra. *The Purely Functional Software Deployment Model*. PhD thesis, Utrecht University, Utrecht, The Netherlands, January 2006.
- [6] B. Dumitriu. Extensible and customizable data-flow transformation strategies for object-oriented programs. Master's thesis, Utrecht University, 2006. (In progress).
- [7] A. Hemel. NixOS. Master's thesis, Utrecht University, 2006. (In progress).
- [8] M. Kolthoff. Vectorization strategies. Master's thesis, Utrecht University, 2006. (In progress).
- [9] R. van den Broek. Software release management with a Nix build farm. Master's thesis, Utrecht University, 2006. (In progress).
- [10] R. van Wanrooij. Unification of software composition mechanisms. Master's thesis, Utrecht University, 2006. (In progress).
- [11] J. van Zessen. An optimizer in stratego for the helium core language. Master's thesis, Utrecht University, (In progress) 2006.

2005

- [12] R. de Groot. Design and implementation of embedded domain-specific languages. Master's thesis, Utrecht University, Utrecht, The Netherlands, September 2005. INF/SCR-05-10.
- [13] E. Eijkelenboom. Trends in software evolution. Master's thesis, Utrecht University, Utrecht, The Netherlands, March 2005. INF/SCR-04-62.
- [14] N. Janssen. Transformation tool composition. Master's thesis, Utrecht University, Utrecht, The Netherlands, March 2005. INF/SCR-04-64.

- [15] K. Muilwijk. Automated analysis of unit tests to improve understanding of software systems. Master's thesis, Utrecht University, Utrecht, The Netherlands, December 2005. INF/SCR-05-25.
- [16] R. van Beusekom. A vectorizer for octave. Master's thesis, Utrecht University, Utrecht, The Netherlands, February 2005. INF/SRC-04-53.
- [17] R. Verrips. A survey of legacy migration. Master's thesis, Utrecht University, Utrecht, The Netherlands, September 2005. INF/SCR-05-08.

2004

- [18] A. van Dam. Extending dynamic rules. An application-oriented study into Stratego's new dynamic rules. Master's thesis, Utrecht University, Utrecht, The Netherlands, February 2004. INF/SCR-04-25.
- [19] R. B. Vermaas. xDoc. An extensible documentation generator. Master's thesis, Utrecht University, Utrecht, The Netherlands, February 2004. INF/SCR-03-41.

2003

- [20] O. S. Bagge. CodeBoost: A framework for transforming C++ programs. Master's thesis, University of Bergen, P.O.Box 7800, N-5020 Bergen, Norway, March 2003.
- [21] M. Bravenboer. Connecting XML processing and term rewriting with tree grammars. Master's thesis, Utrecht University, Utrecht, The Netherlands, November 2003.
- [22] K. T. Kalleberg. User-configurable, high-level transformations with CodeBoost. Master's thesis, University of Bergen, P.O.Box 7800, N-5020 Bergen, Norway, March 2003.
- [23] J. Kruger. Specification of loop optimizations in Stratego. Improving the autobayes system. Master's thesis, Utrecht University, Utrecht, The Netherlands, November 2003.
- [24] A. van Dam. Simplifying the simplifier. HsOpt: a modular, rewrite rule based simplifier for the helium compiler, a non-strict functional compiler. Master's thesis, Utrecht University, Utrecht, The Netherlands, July 2003. INF/SCR-03-25.
- [25] J. van Wijngaarden. Code generation from a domain specific language. designing and implementing complex program transformations. Master's thesis, Utrecht University, Utrecht, The Netherlands, July 2003. INF/SCR-03-29.

2002

- [26] L. Swart. Partial evaluation using rewrite rules. A specification of a partial evaluator for Similix in Stratego. Master's thesis, Utrecht University, Utrecht, The Netherlands, August 2002. INF/SCR-2002-12.
- [27] H. Westra. Configurable transformations for high-quality automatic program improvement. CobolX: a case study. Master's thesis, Utrecht University, Utrecht, The Netherlands, February 2002.

2001

- [28] A. de Bruijn. Implementation of inlining in Stratego. Master's thesis, Utrecht University, Utrecht, The Netherlands, August 2001.
- [29] E. Dolstra. First-class rules and generic traversal for program transformation languages. Master's thesis, Utrecht University, Utrecht, The Netherlands, August 2001. INF/SCR-2001-15.

2000

- [30] K. J. Olmos. Reverse engineering transformations for DSP code generation. Master's thesis, Utrecht University and Universidad Mayor de San Simón, Utrecht, The Netherlands, November 2000.

1997

- [31] M. d. Jonge. Reusing ASF+SDF specifications by means of renaming. Master's thesis, University of Amsterdam, Amsterdam, The Netherlands, 1997.
